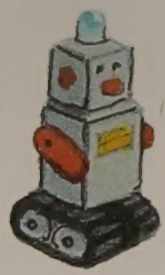
On every double page with pictures, there is a little yellow duck to look for. Can you find it?

About this book

Latin was the language of the ancient Romans. More than a thousand years ago, their huge empire stretched across Europe and into Africa and Asia. Today there are very few people who can speak Latin fluently, but it is still used by the Roman Catholic Church, as well as by lawyers and in scientific names. With this book you'll find it easy to learn Latin words by looking at the small, labelled pictures. Then you can practise the words by talking about the large central pictures.



Genders

When you look at Latin words for things such as "table" or "man", you will see that they have **(m)**, **(f)** or **(n)** beside them. This is because all Latin words for things and people are either masculine, feminine or neuter. This is called the **gender** of the word. Plural words are given as **(m pl)**, **(f pl)** or **(n pl)**.

Often, masculine words end in **-us**, feminine words in **-a** and neuter words in **-um**, but there are many exceptions. This means that it's a good idea to learn the gender whenever you learn a new word.

Articles

Unlike in English, Latin never uses **articles** ('the', 'a' or 'an'). Instead of saying "*the* table", or "*a* table", the Romans just said "mensa".

New words

In this book you'll find words for things that hadn't been invented when the ancient Romans were alive. These new words are composed by experts to represent what the Romans would have said. In many cases, they are taken from the official Vatican Lexicon of modern words in Latin.

Saying Latin words

The Romans lived such a long time ago that no one knows exactly what their language sounded like, although we can guess quite a lot from Roman books and other writing. For some tips on how to pronounce Latin words, go to the Latin-English word list at the back of the book.

Word list

In this list, you can find all the Latin words in the book, listed in alphabetical order. Remember that Latin nouns (words for people or things) are either masculine, feminine or neuter (see page 3). Next to each word, you can see its English translation.

About Latin pronunciation
Read each Latin word as if it were an English word, but be sure to pronounce each letter, even when a word ends with **e** (say it as "eh"). Try to remember the following points about how Latin words are said:

- **ae** is pronounced like the **ie** in **tie**
- **au** is pronounced like the **ow** in **now**
- The Latin **c** is always pronounced **k**, even before **e**, **h** or **i**
- The Latin **g** is always pronounced as in **go**
- An **i** before a vowel at the beginning of a word is pronounced like the **y** in **yet**.
- The Latin **u** is pronounced **oo**
- The Latin **v** is pronounced **w**

This bright and amusing book provides a wealth of vocabulary-building opportunities for beginner Latin learners of all ages. Stephen Cartwright's delightful pictures encourage direct association of the Latin word with the object, which will ensure effective, long-term learning. Contemporary scenes introduce the Latin words for many modern-day objects, bringing the classical language to life. At the end of the book there is a Latin/English list of all the words used.

This book is also available in other languages, providing wonderful learning opportunities for young foreign language learners. Look out for: **First Thousand Words in French**, **First Thousand Words in Italian**, **First Thousand Words in Spanish**, **First Thousand Words in Portuguese**, **First Thousand Words in German**, **First Thousand Words in Russian**, **First Thousand words in Polish**, **First Thousand Words in Arabic**, **First Thousand Words in Hebrew**, **First Thousand words in Chinese** and **First Thousand Words in Japanese**.
